Review Strategies

**Levels of Reading**

1. First, read through the passage quickly to get the gist. Mark up your text with symbols:
   - √ = I know this already.
   - ! = Wow! That’s new information!
   - ? = Huh? I don’t understand this...

2. Compare your marks with your study partners. See if they can help you understand parts of the text you don’t understand.

3. Now, take a little more time. Read the questions in the margins. Highlight the parts of the text that contain answers to the questions. Be sure you are getting all of the information that answers each question.

**Vocabulary Selective Highlighting**

1. As you read the text, use a highlighter to highlight the vocabulary words that appear in bold print, as follows:
   - Blue = I pretty much know what this word means.
   - Yellow = Okay, I don’t have a clue what this word means.

**Remember**: You already know a lot!! This is all about reviewing what you might have forgotten.
**Big Idea:** Based on the work of anthropologists, paleontologists, and archaeologists, we can reconstruct the development of humans from hunter-gatherer societies to settled communities. Early human communities populated Africa, Europe, and Asia, and later migrated to Australia and North and South America, adapting to the diverse environments found in each location.

**Time Frame:** 3 Million BCE - 3000 BCE

| What were some of the developments leading to modern humans?  
*Some of the developments leading to modern humans were...* | **Early Humans**  
Based on the work of *anthropologists, archaeologists, and paleontologists,* historians have been able to reconstruct the mysteries of prehistoric humans. In 1974, Donald Johanson discovered evidence of early *hominids* such as *Australopithecus afarensis* (“Lucy”) living in Africa about 3 to 4 million years ago. They were bipeds, meaning they walked on two feet. Louis and Mary Leakey found evidence of hominids in Africa who used early tools and who lived about 1.5 to 2 million years ago. They called these hominids *Homo habilis,* or “Handy Man.” In 1891, Eugene Dubois discovered the bones of a group of hominids who lived in Asia 1.8 million to 200,000 BCE. He called this group *Homo erectus,* or “Upright Man.” This group of hominids is notable for more advanced tools and being able to use fire to cook meat.  
Prehistoric humans, known as *Homo sapiens sapiens,* or “Doubly Wise Man,” originated in Africa and spread to Europe, Asia, and Australia between 35,000 to 12,000 BCE. Eventually, they migrated to North and South America. The first humans looked more like us. They were able to survive in cold climates through *adaptation,* their ability to create better tools, shelter, and clothing. These early humans also created artwork, including cave paintings, carved images of clay, bone, and ivory, and even musical instruments. |
| How did early modern humans adapt to their environment?  
*Early humans were able to adapt to their environment by...* | --- |
What are some key differences between the Old Stone Age and New Stone Age?

Some differences between the Old Stone Age and New Stone Age are...

<table>
<thead>
<tr>
<th>From Old Stone Age to New Stone Age</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Old Stone (Paleolithic) Age began about 2 million years ago and lasted until about 8000 B.C.E. It was during this time that early modern humans developed. Like the hominids who came before them, early humans were hunter-gatherers. They wandered from place to place, looking for animals to hunt and plants to gather for food. Often they took shelter in caves.</td>
</tr>
<tr>
<td>The New Stone (Neolithic) Age began when people learned to farm and produce their own food. The discovery of farming did not happen all at once. Over thousands of years, people gradually learned to raise animals and plant crops. Eventually they began to rely on farms for their food. Many historians call this the agricultural revolution. Now they could settle down in one place instead of roaming in search of things to eat. The Neolithic Age began around 8000 B.C.E. and lasted until about 3000 B.C.E., when people learned to make tools out of metal instead of stone. Farming and the domestication of animals developed in many parts of the world during this time, including parts of Europe, Africa, Asia, and the Americas.</td>

Big Idea: Settled farming societies located next to major rivers developed into early civilizations (Mesopotamia around the Tigris and Euphrates Rivers; Egypt around the Nile River). These early civilizations had highly structured governments that maintained political and social order through religious beliefs. They developed writing, refined art and architecture, and law codes, such as Hammurabi’s Code.

Time Frame: 3000 BCE – 350 CE

<tr>
<td>Where did early civilizations arise? Why? Early civilizations arose around... because...</td>
<td>Early Civilizations and the Environment Early civilizations arose in areas whose environmental factors could support large populations. The most important factor was water for drinking, bathing, irrigation, and transportation. For this reason, early civilizations arose around rivers. Since early civilizations needed enough food to support large populations, two other factors were important: topography and climate. The topography (land surface) had to be relatively flat to allow for farming, and the climate needed to support vegetation, or plant life, especially the crops people grew.</td>
</tr>
<tr>
<td>Describe early city-states in Mesopotamia. Early city-states in Mesopotamia were...</td>
<td>Mesopotamia (Sumer, Babylonia) The first civilization arose in Mesopotamia (modern-day Iraq) in the area between the Tigris River and the Euphrates River. Cities first appeared in the southern part of this land, an area called Sumer. These first cities were like small, independent countries, with their own ruler and their own farmland; for this reason, they are called city-states. The Sumerians built complex irrigation systems and developed tools such as the plow that enabled them to increase their food supply that resulted in a surplus of food to support its population. To defend themselves from attack, Sumerian city-states built walls and dug moats around their cities. Sumerian city-states were ruled by kings. Sumerian kings were priest-kings, and the Sumerians believed that their kings were chosen by the gods. This belief made their kings very powerful, since Sumerians believed they must obey the will of the gods. A Mesopotamian city-state called Babylon united all of Mesopotamia under</td>

What did the Egyptians believe about their pharaohs? The Egyptians believed that...

What was Kush? Kush was...

---

The rule of Hammurabi, the king of Babylon. Hammurabi is best known for his detailed legal code, which covered many situations, such as trade, payment for work, marriage and divorce. Hammurabi used the code of laws to unify his empire and to preserve order.

The Sumerians created a written language called cuneiform around 2400 BCE. It was used to record information about the goods Sumerians exchanged with each other, and later for literature.

**Egypt**

The Nile River valley provided Egypt with an environment in which crops and cities could flourish. Ancient Egypt enjoyed three long periods of stability and unity under the rule of pharaohs. The Old Kingdom lasted from about 2700 to 2200 B.C.E. During this time, early pharaohs set up a strong central government. Some pharaohs, like Khufu, built great pyramids as tombs for themselves. During the Middle Kingdom (about 2000 to 1800 B.C.E.), Egyptians made many great achievements in literature, art, and architecture. The New Kingdom (about 1600 to 1100 B.C.E.) is often called Egypt's Golden Age. During this time of peace and stability, Egypt's power reached its height. Hatshepsut, Egypt's first female pharaoh, supported Egyptian trade. Ramses the Great was a superior military leader and built gigantic monuments.

As in Mesopotamia, religion played a central role in Egypt's social and political order. The pharaohs were believed to be gods. They owned all the land and were responsible for the people's well-being. During their lifetimes, they built massive temples dedicated to the gods and other monuments to glorify their power and success. After they died, they were buried in great tombs that were built to last forever.

Like the Sumerians, Egypt developed its own writing system, called hieroglyphic writing. Hieroglyphic writing uses pictures called hieroglyphs to represent sounds and ideas. The Egyptians used hieroglyphic writing to record their history, keep records, and write literature.

**Kush**

The Kushite civilization settled to the south of Egypt, along the southern part of the Nile. Their civilization began around 2000 BCE and lasted until 350 CE. Egypt and Kush had close ties for centuries. Each country invaded and conquered the other. Kushite pharaohs ruled Egypt for nearly a century, and modeled the art and architecture of their own civilization after Egypt.

The Ancient Hebrews and the Origins of Judaism

The Hebrew civilization developed gradually after 1800 B.C.E. and flourished until 70 C.E. The people who became the Hebrews originally lived in Mesopotamia. Around 1950 B.C.E., they moved to the land of Canaan (modern-day Israel). The Hebrews were the founders of Judaism, one of the world's major religions. The Hebrews eventually became known as the Jews. Judaism is the Jewish religion. The origins of Judaism and its basic laws are recorded in its most sacred text, the Torah. The word Torah means "God's teaching." The Torah consists of the first five books of the Hebrew Bible. (Christians refer to the Hebrew Bible as the Old Testament.)

Historians rely on many artifacts to learn about the ancient Hebrews and their time, including the Torah. According to the Torah, the ancestor of the Hebrews, a man named Abraham, lived near Ur in Mesopotamia. Around 1950 B.C.E., Abraham and his clan migrated to the land of Canaan. Settling in Canaan, the Hebrews herded flocks of sheep and goats. About 1800 B.C.E., many Hebrews moved to Egypt. According to the first book of the Torah, they fled Canaan because of a famine. For a time they prospered in Egypt, but eventually they were made slaves. In time, one of their leaders, Moses, led the Hebrews in their escape from Egypt. For 40 years, says the Torah, the Hebrews wandered in the wilderness, until they settled once again in Canaan. By 1000 B.C.E., the Hebrews had set up the kingdom of Israel in Canaan under King David and his son, King Solomon. David forged the Hebrews into one united nation. Solomon built a magnificent temple in the capital city of Jerusalem.
### The Influence of Judaism

The religious and moral ideas of Judaism have left a lasting mark on Western civilization. Three important beliefs and practices still influence us today: monotheism; following the law; and concepts of equality and justice.

**Monotheism:** Most people in ancient times believed in many gods. The Hebrews were different. They believed that there is only one God, a belief called **monotheism**. Judaism teaches that God is all-powerful and all-knowing. God is also the source of morality (standards of right and wrong).

**Following the Law:** Judaism’s oldest laws are the Ten Commandments. The commandments tell how to honor God. The commandments also lay down **moral laws of ethics** (right and wrong), such as “You shall not steal” and “You shall not murder.” Many Western countries adopted these laws of right and wrong.

**Equality and Social Justice:** Unlike some other ancient peoples, the Hebrews did not view their leaders as gods. They believed that there is only one God, and even kings had to obey God’s laws. Judaism teaches that all people who keep the laws are equal in God’s sight. Belief in equality goes hand in hand with a concern for social **justice**. Caring for the less fortunate people in society is a basic value in Judaism.

### The Survival of Judaism

The Hebrew kingdom split in two after the death of King Solomon. Weakened by this division, the Hebrews were less able to fight off invaders. In 586 B.C.E., Nebuchadrezzar burned down Solomon’s great Temple of Jerusalem and all the houses in the city. Most of the people of Judah were taken as captives to Babylon. The captivity in Babylon was the beginning of the Jewish Diaspora. The word **diaspora** means "a scattering." Never again would most of the followers of Judaism be together in a single homeland.

Later, the Jews living in Judah were conquered by the Romans. In 66 CE, the Jews rose up in rebellion against the Romans. In 70 CE, the Romans led an army against the Jews. The Romans destroyed Jerusalem and its great temple. Despite having lost their homeland and holy city, Judaism survived through the formation of **synagogues** and the tradition of allowing any adult male to read from the Torah. Jews no longer needed a trained leader to learn about Jewish history and law. These new practices helped Jews preserve their religion in communities around the world.

| How did the Greek civilization develop?                                  | Development of Greek Civilization  
The Greeks settled first in isolated communities because of their country's mountainous geography. Most Greeks survived by farming, but good farmland was scarce. So the Greeks took to the seas, creating new colonies and trading with other peoples.  

**Athens and the Rise of Democracy**  
The ancient Greeks knew they had many things in common and had a unified culture. For example, they all spoke the same language. But they did not think of themselves as one country. Instead, every Greek identified with a hometown that he or she called "the city." The city included both a settlement and its surrounding farmland. Most Greeks were fiercely proud of their cities. Each city had its own laws, its own army, and its own money. Most important, each city had its own form of government. For this reason, ancient Greek cities are called city-states.  
Four forms of government that developed in the Greek city-states: monarchy, oligarchy, tyranny, and democracy. Unhappiness with one form of rule led the Greeks to try another. Early monarchies (governments led by a king), gave way to oligarchies (government by a few). In turn, many oligarchies were replaced by tyrannies (government where one person takes power by force). Eventually, Athens developed a democracy or “rule by the people,” a government where all citizens shared in the ruling power.  
Ancient Greek democracy was different from democracy today. The government of Athens was a direct democracy. In this type of government, every citizen can vote on every

issue. Unlike Athens, the United States is a representative democracy. In this type of government, people vote for representatives who decide issues in their name.

Athens and Sparta

Athens and Sparta were two very different city-states in ancient Greece. Athens was a democracy, though only free men could take part in its government. Its economy depended on trade. Boys were educated to be good citizens. Girls learned skills for managing the household. Women and slaves had far fewer rights than men had. Sparta was more isolated than Athens. It was primarily a military state. Its government was an oligarchy in which a few men held most of the power. The Spartan economy depended on farming and conquest. Boys and girls alike were educated to protect the city-state. Spartan women had more rights than other Greek women. The city depended on slaves and other non-citizens to provide for many of its needs.

Athens and Sparta were bitter rivals. However, they came together with other Greek city-states to defeat the Persian Empire, which threatened to take over Greece. With the defeat of the Persians, Athens became the dominant city-state in Greece. Later, Athens and Sparta fought each other in the Peloponnesian War. Sparta defeated Athens in this war, and Athens lost its dominance.

Alexander the Great

Alexander the Great became king of Macedonia after his father's murder. By that time, Macedonia already controlled most of Greece. As skilled general, Alexander conquered a vast empire that spanned much of Asia as well as Egypt. To unify this huge territory, he spread Greek ideas, used religion, and showed respect for the cultures of the people he conquered. Alexander's empire soon died, but Greek ideas lived on.

Contributions of the Greeks

The Greeks made many important contributions to Western civilization. For example, Hypatia was the first woman to earn fame as a mathematician, teaching Greek philosophy and mathematics in the city of Alexandria. Euclid was another famous Greek mathematician. His geometry textbook became the basis for the teaching of geometry for more than 2,000 years.

The Greeks also produced famous philosophers. Socrates was always encouraging people to question the things they thought they knew. He taught others by asking questions that forced them to think about their beliefs. His example inspired many other Greek thinkers, especially his student Plato. Plato taught these same ideas to Aristotle, who was the teacher of Alexander the Great.

Greek literature influences us today. The mythology of the Greeks, Greek epic poetry such as Homer's Iliad and Odyssey, even Aesop's Fables are stories we still read today. Historians today follow in the footsteps of Thucydides, considered one of the greatest historians of the ancient world, who wrote about the wars between Athens and Sparta.
ANCIENT INDIA

Big Idea: Early civilizations arose in India along fertile rivers. They developed an elaborate social structure known as the caste system, which divided society into several levels. Early belief systems, such as Buddhism, developed in India and spread beyond its borders. The early civilizations of India developed impressive cultural achievements in literature, science, and mathematics.

Time Frame: 2700 BCE – 550 CE

<tr>
<td>Where did the early civilizations of India develop?</td>
<td><strong>Early Civilizations in India</strong>&lt;br&gt;Like many ancient peoples, the first people in India settled by rivers, such as the Indus River and the ancient Sarasvati River. The rivers provided plenty of water. The fertile soil was ideal for farming. The rivers could also be used for travel and trade. Soon, a vibrant civilization arose in such cities as Mohenjodaro, which was a large and well-planned city with a high quality of life.</td>
</tr>
<tr>
<td>What was the caste system? How did it develop in India?</td>
<td><strong>Hinduism and the Caste System</strong>&lt;br&gt;&lt;br&gt;<strong>Hinduism</strong> was India’s first major religion. It teaches concepts such as dharma (law, obligation, and duty), deities (multiple gods), samsara (reincarnation) and karma (what we do in this life affects future lives). It developed over a long time, perhaps being brought into India by Aryan <strong>invaders</strong>. Early Hindu religion is called Vedism, after sacred texts. A class of priests and religious scholars, called Brahmins, became important because only they knew how to interpret the Vedas and perform the rituals. Brahmins became the dominant class in India. Later Vedism is known as <strong>Brahmanism</strong>.&lt;br&gt;&lt;br&gt;Brahmanism taught that a well-organized society was divided into <strong>social classes</strong>. Europeans later called this the <strong>caste system</strong>. Each social class had its own duties. Brahmins were the highest caste; untouchables were the lowest. Indians were born into a certain caste, and they could not change it. People could marry only within their own caste.</td>

**Buddhism**

*Buddhism* is another great religion that began in India. Buddhism is based on the teachings of the Buddha, which means “Awakened One.” The Buddha was a man who lived in India from about 563 to 483 BCE. Before earning the title of Buddha, he was a young prince named Siddhartha Gautama. At the age of 29, Prince Siddhartha walked away from his royal life and went in search of spiritual peace. During his journeys, he learned great truths that changed his life. By sharing these truths with others, he began the great religion of Buddhism.

Buddhism was different from Hinduism in several ways. It was not based on complicated rituals and beliefs in many gods, as Hinduism was. Instead, it was a way of life based on simple teachings. Unlike ancient Hinduism, Buddhism embraced all people regardless of their caste. It taught people how to reach enlightenment, or happiness that comes from the knowledge of deep truth, as embodied in the Four Noble Truths (life in suffering; suffering is caused by desires; the way to end suffering is to give up desires; to give up desires one must live a moral and focused life).

Buddhists believed that once they reached enlightenment, they would no longer be reborn again and again. The Buddha chose to teach others the path that he had found. In time, his followers spread his teachings throughout India and other parts of Asia.

Later, India was unified for the first time under the Mauryan *Empire*. The Mauryas created their empire through a series of wars and conquests. This changed when King Ashoka turned away from violence. Ashoka adopted Buddhist values. He promoted Buddhism, justice, and security.

**Achievements of Ancient India**

India reached its *Golden Age* during the time of the Gupta Empire. The Guptas encouraged learning by building universities. Writing, painting, sculpture, and metalwork flourished. For example, Gupta writers created many kinds of literary works. The *Bhagavad Gita* (“Song of the Lord”) is one of the most beautiful works of Hinduism. In this poem, a prince is taught basic truths of Hinduism by Krishna, an early form of the deity Vishnu. Gupta mathematicians also made important advances, such as place value, the decimal system, and the concept of zero. Many of these achievements, especially in mathematics and literature, continue to affect the world today.

<td><strong>Confucianism and Daoism</strong></td>
</tr>
<tr>
<td></td>
<td>During the Zhou Dynasty, three Chinese philosophies developed: Confucianism, Daoism, and Legalism. During the Zhou Dynasty’s later years, China collapsed into disorder. Political instability led many scholars to debate the proper way to rule. Confucius taught that peace and order depended upon proper behavior. Those in authority must lead by example. Those below them must obey. Daoists believed that people should live simply and in harmony with nature. They said the best rulers were those who ruled the least. Finally, Legalists like Hanfeizi believed that people were driven by their own self-interest. They taught that rulers could create order only through strict laws and harsh punishments.</td>
</tr>
</tbody>
</table>
### Qin and Han Dynasties

Qin Shihuangdi was China’s first **emperor**. The Emperor of Qin had a major influence on China. He unified China and greatly expanded its borders. He centralized the government. He standardized Chinese laws, money, weights, measures, and writing. Among his many construction projects was the Great Wall. Later Chinese rulers built on what the Emperor of Qin left behind, including government institutions and the Great Wall itself. The office of emperor that he created lasted for 2,000 years. Even China’s name in the western world comes from the word Qin. But the harshness of the Emperor of Qin’s rule led to an early end for his dynasty.

The Han Dynasty ruled China for more than 400 years. Most of this period was a time of peace, wealth, and achievement for China. Under the Han, the Chinese made advances in many areas. New weapons helped Han emperors succeed in war and expand their **empire**. The government was organized into a **bureaucracy** staffed by civil servants who were chosen for their ability. A number of inventions improved agriculture and the important silk and salt industries. The invention of paper advanced the art of calligraphy. Healers used techniques and practices that are still used today. Finally, Chinese scientists made important observations and invented the seismograph and the compass.

### The Silk Road

The **Silk Road** was a network of trade routes between China and the West (Europe). The Silk Road was opened under the Han and remained a major route of trade for more than 1,000 years. Many goods were exchanged along the Silk Road, including silk from China and glassware from Rome. In addition to new products, trade brought cultural **diffusion** and change to both East and West. One of the most important changes was the introduction of Buddhism to China.

Questions

<table>
<thead>
<tr>
<th>How did Rome begin?</th>
<th>The Beginnings of Rome</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rome began...</td>
<td>According to mythology, Romulus founded and named the city of Rome after the death of his twin brother Remus. Supposedly, they were descended from Aeneas, a hero of the Trojan War who settled on the Italian peninsula. The reality is somewhat different. The city of Rome was founded by Latins who settled near the Tiber River. Over time, the Romans borrowed many ideas and skills from their neighbors. Two groups who greatly influenced Roman culture were the Etruscans and the Greeks. Romans learned a great deal about engineering from the Etruscans. They also adopted some Etruscan sporting events. Greek civilization had a huge influence on Roman culture. You can see the influence of Greek ideas in Roman architecture, writing, art, and mythology.</td>

<table>
<thead>
<tr>
<th>What were some key features of Roman government during the Republic?</th>
<th>The Roman Republic</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some key features of Roman government during the Republic were...</td>
<td>The Romans overthrew the Etruscans and created a republic, a government that was based on the concept of elected officials, in this case the Roman Senate. Romans were proud of their republic and of being Roman citizens. Sometimes, during times of war, they handed power over to a dictator. Dictators were men who were given special powers for a limited period of time. But for the most part, elected leaders ruled Rome for 500 years.</td>
</tr>
<tr>
<td>Question</td>
<td>Answer</td>
</tr>
<tr>
<td>-------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>How do Rome’s republican ideas influence us today?</td>
<td>Rome’s republican form of government inspired future ages in Europe and America. Rome set an example of a government ruled by a written <strong>constitution</strong> (set of basic laws). Future republicans also pointed to Roman ideals of elected assemblies, citizenship, and civic duty. They adopted the model of governmental bodies that could check each other’s power. Above all, they were inspired by the spirit of republicanism. Cicero, a famous Roman statesman, captured this spirit when he wrote, &quot;The people’s good is the highest law.&quot;</td>
</tr>
<tr>
<td>How did Rome become an empire?</td>
<td>From 145 to 44 BCE, Rome came to rule the entire Mediterranean world. But the republic was in trouble. <strong>Civil wars</strong> divided the city. They set their armies against the power of the Senate. Julius Caesar, a Roman general, himself ruled as a dictator before he was murdered in 44 BCE by senators who thought he had become too powerful. The men who killed Caesar thought they were saving the power of the Senate. However, Caesar’s grandnephew, Octavian, seized power. The Senate named him Augustus. Rome was now an <strong>empire</strong> governed by one supreme ruler. Augustus added a great deal of new territory by pushing the borders of the empire all the way to natural boundaries, like rivers, to make it easier to defend. Later emperors added even more territory. In the year 117 CE, Rome reached its greatest size.</td>
</tr>
<tr>
<td>What are some of the beliefs of Christianity?</td>
<td><strong>Christianity</strong>, a monotheistic religion based on the teachings and worship of Jesus of Nazareth, started in Judea. Writers wrote accounts of Jesus’ life in books called gospels, which contained his teachings. Jesus based his teaching on traditional Jewish beliefs, but the gospels say he put special emphasis on love and mercy. After Jesus’ death, one of his followers, Paul, became a Christian missionary and tried to convert others to Christianity. He preached across the Roman Empire, stressing the need to believe in Jesus as the Son of God. At first, Christians were exposed to severe persecution by emperors who thought that Christians were a threat to the empire. Gradually, people of all classes adopted the new faith. In 313 CE, Emperor Constantine gave Christians the freedom to practice their religion openly. Future emperors also accepted the new faith. In 392, Emperor Theodosius I banned all <strong>pagan</strong> sacrifices. By the time he died in 395, Christianity was the official religion of the Roman Empire.</td>

<tr>
<td>How does ancient Rome influence us today?</td>
<td><strong>The Legacy of Rome</strong> The end of the Roman Empire did not mean the end of Roman civilization. Many of the ideas of the ancient Romans still affect us today. For example, Roman ideas about art (mosaics, frescoes, sculpture), <strong>architecture</strong> (domes, arches, columns), language (Latin root words and prefixes), law (legal codes, concepts of justice and citizenship), and <strong>technology</strong> (roads, aqueducts) are some of the ways that Rome still influences us today.</td>

**Key Vocabulary**

- architecture
- Christianity
- civil war
- constitution
- dictator
- empire
- GRAPES
- legacy
- pagan
- peninsula
- republic
- technology
6th Grade Glossary

A

achievement: an accomplishment
adaptation: changing in response to new surroundings
anthropologist: someone who studies the origins, behaviors, and development of humans
aqueduct: a pipe or channel that brings water from distant places
arch: an upside-down U- or V-shaped structure that supports weight above it, as in a doorway
archeologist: an expert who studies the past by examining objects that people have left behind
architecture: the art of designing buildings

B

Brahman: in Hinduism, the one supreme power, or divine force, that everything is a part of
Brahmanism: an ancient Indian religion in which the Brahmins (priests and religious scholars) are the dominant class
Buddhism: a religion of India begun by Prince Siddhartha, or the Buddha
bureaucracy: a form of government characterized by many levels of organization

C

caste: a class, or group, in Hindu society cavalry soldiers who ride on horses
Christianity: the religion based on the life and teachings of Jesus Christ
citizenship: belonging to a democracy with certain rights and responsibilities
city-state: an early city that was like a small, independent country with its own laws and government
civilization: a culture marked by developments in arts, sciences, government, and social structure
civil war: a war between regions of the same country
climate: the average weather conditions at a particular place
commerce: business
Confucianism: a Chinese philosophy that emphasizes proper behavior
constitution: a document that outlines the plan for a government

D

collection: something valuable that is given without expectation of compensation
culture: a characteristic of civilization that includes the beliefs and behaviors of a society or group of people
currency: money

Daoism: a Chinese philosophy that emphasizes living in harmony with nature
democracy: a form of government in which the ruling power is shared by all citizens
Diaspora: the dispersal of the Jews from Judea in the 6th century BCE
dictator: an ancient Roman leader who was called to serve during a time of crisis
diffusion: spread
direct democracy: a democracy in which all citizens take part in making political decisions
domestication: training a wild animal to be useful to humans
dynasty: a family or group that rules for several generations

E

economy: a system of managing the wealth of a community or region
emperor: the leader of an empire
empire: a large territory in which several groups of people are ruled by a single leader or government
environment: natural surroundings
epic: a tale of a hero, often in the form of a long poem
era: period of time
ethics: beliefs about what is right and wrong
Exodus: the escape of the Hebrews from Egyptian slavery

F

fertile: good for farming

G

geography: the physical features of an area
golden age: a civilization’s high point, during which it has its greatest power and cultural achievements in art and literature

H

hieroglyph: a symbol used in hieroglyphics, a system of writing developed in about 3000 B.C.E.
Hinduism: India's first major religion
hunter-gatherer: one who survives by hunting wild animals and gathering plants found in the wild

imperial: having to do with an empire

invader: someone who enters a country by attacking it

irrigation: a system of supplying land with water

Judaism: a major world religion that was founded by the Hebrews

justice: fairness under the law

karma: in Hinduism, the belief that how a person lives will affect their next life

legacy: a contribution of one culture to another

legal code: a collection of laws

literature: works of writing such as novels, histories, poems, or plays

merchant: a person who makes money by selling goods

migration: moving from one geographic region to another

monotheism: the belief that there is only one God

moral law: laws that teach what is right and wrong

mythology: traditional stories that help to explain a culture's beliefs

Neolithic Age: the later part of the Stone Age, called the New Stone Age, from 8000 to 3000 B.C.E.

oasis: a place where water can be found in a desert

oligarchy: a form of government in which the ruling power is in the hands of a few people

pagan: non-Christian

Paleolithic Age: the first period of the Stone Age, called the Old Stone Age, from about 2 million years ago to around 8000 B.C.E.

paleontologist: a scientist who studies prehistoric times

peninsula: an area of land surrounded by water on three sides

pharaoh: an ancient Egyptian leader

philosophy: a theory or set of values by which one lives; the search for wisdom or knowledge

politics: having to do with government

priest-king: a ruler who is both a political and religious leader

religion: a set of spiritual beliefs, values, and practices

representative: an elected official who represents those who elected him

representative democracy: a form of government in which elected officials make decisions in the name of the voters

republic: a form of government with elected leaders

settlement: a small community or village

Silk Road: a network of trade routes that stretched more than 4,000 miles across Asia

social class: a group of people who share similar economic or social backgrounds within a society

social structure: the way a society or civilization is organized

surplus: extra

synagogue: a place of Jewish worship

technology: the use of tools and other inventions for practical purposes

territory: an area of land

Torah: the first five books of the Jewish Bible

trade: the business of buying and selling or exchanging items

trade route: a network of roads along which traders traveled

tyrranny: a form of government in which the ruling power is in the hands of one person who is not a lawful king

Vedas: a collection of Hindu sacred writings

vegetation: the plant life of a place or region
Grade 6

Curricular Narrative
In the 6th grade, you learned about the important people and major events of early Western and non-Western civilizations, including the early societies of the Near East and Africa, the ancient Hebrew civilization, Greece, Rome, and the civilizations of India and of China.

**Big Ideas**

Civilizations may be analyzed using the GRAPES model. GRAPES stands for:
- Geography – landforms, water features, and the environment
- Religion – belief systems about deity, right and wrong, and death
- Achievements – great accomplishments and contributions
- Politics – government and law
- Economics – production and distribution of goods and services; money
- Social Structures – organization of people within a society

As you think about what you learned in 6th grade, see if you can identify something you learned in each of the GRAPES categories for each civilization.

Remember, history is divided into two parts: BC (Before Christ) and AD (Anno Domini). These two periods are also labeled BCE (Before the Common Era) and CE (Common Era). You should be familiar with both sets of terminology.

**Famous People**

Among the major figures you learned about in 6th grade were those who helped to establish these early societies and their codes of ethics and justice and their rule of law, such as Hammurabi, Abraham, Moses, David, Pericles, and Asoka; those who extended these early empires and carried their influence into much of the ancient world, including Alexander the Great, Julius Caesar, and Augustus Caesar; and those whose ideas and teachings became lasting influences in Western and non-Western thought, especially Socrates, Jesus, the Buddha, and Confucius. For all these societies, remember that these major contributions, achievements, and belief systems have lasted across the centuries to the present day.

**Early Humankind and the Development of Human Societies**
Paleontological discoveries in East Africa by Donald Johanson, Tim White, and the Leakey Family (Louis, Mary, and Richard) support the belief that ancestors of present-day humans lived in East Africa 4.5 million years ago. During the Old Stone Age (Paleolithic), Middle Stone Age (Mesolithic), and New Stone Age (Neolithic), the interaction between the environment and the developing lifestyles of prehistoric peoples changed as they moved from nomadic hunter-gatherers to settled food producers (farmers).

During this time, early peoples attempted to explain the universe through cave art and early forms of religion; they developed a wide range of tools, beginning with stone tools (at first, simple and later, more complex) and later developing metal tools (iron and bronze); and they developed language as a medium for transmitting and accumulating knowledge.

The Beginnings of Civilization in the Near East and Africa: Mesopotamia, Egypt, and Kush

The peoples of Mesopotamia, especially the Sumerians, settled between the Tigris and Euphrates rivers. As they settled, there were major events that marked their history: the spread of their agricultural villages by 4000 B.C. to lower Mesopotamia; their technological and social accomplishments, including invention of the wheel, plow, and irrigation systems; their systems of cuneiform writing, of measurement, and of law; and the developing social, economic, and political systems that these accomplishments made possible.

In ancient Egypt, Khufu was an important early pharaoh who was responsible for building the Great Pyramid of Giza. Later, during the New Kingdom, two great rulers were Queen Hatshepsut and Ramses II, or "Ramses the Great." During Queen Hatshepsut's reign, Egyptian art and architecture flourished, and trade extended Egyptian influence throughout the Middle East. Ramses II, more typical of the New Kingdom pharaohs, was concerned with warfare and maintaining an Egyptian empire that extended north into the region known as Canaan. Much is known about the daily lives of other people in Egyptian society, such as farmers, tradespeople, architects, artists, scribes, women, children, and slaves, because of the detailed images and models from tombs. In terms of geography, the Nile River was extremely important to Egypt's development; some of the same irrigation practices are still in use.

Finally, you learned about Africa's oldest interior empire, the kingdom of Kush, which conquered Egypt in 728 B.C. and established the twenty-fifth dynasty of pharaohs. Conquered in turn by the Assyrians, the kings of Kush reestablished their capital farther south. The kingdom of Kush developed a
distinctive culture that included the development of iron agricultural tools and weapons; an alphabet; and a profitable trade that extended to Arabia, India, sub-Saharan Africa, and possibly China.

The Foundation of Western Ideas: The Ancient Hebrews and Greeks

One of the principal roots of Western civilization can be found in the enduring contributions of the ancient Hebrews to Western ethical and religious thought and literature, most notably by the Old Testament. The Hebrew Scriptures (Old Testament) are an important part of the literary heritage and ethical teachings of Western civilization. For example, you probably know the stories about the Creation, Noah, the Tower of Babel, Abraham, the Exodus, the Ten Commandments, Ruth and Naomi, David, and Daniel and the Lion’s Den. However, it is important to know that the Hebrew Scriptures also contain the Hebrew people's concepts of wisdom, righteousness, law, and justice.

Another principal root of Western civilization is the Greco-Roman civilization. The ancient Greeks developed early democratic forms of government; the beginning of rational thought expressed in Greek philosophy, mathematics, science, and history; and the enduring cultural contributions of Greek art, architecture, drama, and poetry.

The Greek polis (city-state) provided political organization for Greek civilization and was the center of life for the Greeks. Athens was one important city-state that started with a government that changed from tyranny and oligarchy to an early form of democracy. Even though they had a form of democracy, the Athenians still had slaves. Athens was located at the crossroads of the ancient world and had an important fleet of ships that provided trade and protection. The rivalry between Athens and Sparta led to the Peloponnesian War, which Athens lost. Later, the king of Macedonia, Alexander the Great, conquered many lands and spread of Greek culture throughout the Mediterranean and Middle Eastern worlds. Ultimately, Greece fell to the Romans and became part of the Roman Empire. You learned about the daily life of women and children in Athens and Sparta, the games and sports of the Olympiad, the education of youths, and the trial of Socrates. Remember that the Greeks had a rich mythology and great literature (such as Homer’s Iliad and Odyssey) that have deeply influenced Western art, drama, and literature.

The Early Civilizations of India and China

When Alexander the Great began bringing Greek civilization to the parts of
Asia he conquered between 327 to 325 B.C., his was not the first civilization of this region. Over a thousand years earlier, the Harappan civilization had developed and reached its highest point in the Indus River Valley, having developed complex cities, brick platforms, writing, granaries, and craft workshops. After its collapse, succeeding waves of Aryans from the north spread their influence across the Punjab and Ganges plains. This resulted in a composite civilization rich in its artistic culture (architecture, sculpture, painting, dance, and music) and in its intellectual traditions (Arabic numbers, the zero, medical tradition, and metallurgy).

One of the major religious traditions of India developed during this time. Buddhism, an influential philosophy that emerged in the sixth century B.C., was based on the life and ethical teachings of "The Buddha" or Siddhartha Gautama. Buddha's early life, his Hindu background, and his search for enlightenment, resulted in the central beliefs and moral teachings of Buddhism: unselfishness (returning good for evil); compassion for the suffering of others; tolerance and nonviolence; and not lying, stealing, killing, finding fault with others, and gossiping. While Buddhism did not survive on Indian soil, Jainism, which introduced the idea ahimsa, or nonviolence, has continued to play a role in modern India, especially through Gandhi's idea of nonviolent civil disobedience. Hinduism is another great religion of India and has as one of its most revered texts the Bhagavad Gita. Asoka, the great philosopher-king who unified almost all of India, gave up violence as a national policy, and established Buddhism as the state religion.

Buddhism spread northward to China during this time. You learned about China during the Qin and Han Dynasties (221 B.C. to A.D. 220). The roots of Chinese civilization go far back into ancient times when Shang society (the "molders" of China) first emerged around 1500 B.C. in the Huang-He Valley and established the Chinese language and a highly developed technique of working with bronze.

During succeeding centuries, especially the Zhou Dynasty, China grew by conquering the people on its borders and absorbing the lands of these people as frontier states within Chinese society. By the sixth century B.C., the balance of power between the princes of these newer states and the old imperial centers of central China had broken down, plunging China into political chaos and war. It was during this time, when traditional values were neglected and government was in disarray, that Confucius lived and wrote. He tried to make sense of a troubled world and suggested ways in which individuals and society could achieve goodness. The good person in Confucius's teaching practiced moderation in conduct and emotion, kept one's promises, learned the traditional ways, respected one's elders,
improved oneself through education, and avoided people who were not good. Confucius's teaching promoted the dignity of humanity. However, the role of women in Confucian society was to always take a position lower than men.

Between 221 and 207 B.C. the Qin Dynasty was able to unite China. The longer-lasting Han Dynasty built on the unification, made Confucian teachings official, and placed governmental administration in the hands of the educated civil service, and began a time of peace and prosperity. Confucian filial piety and family ties strengthened the social structure of Han society. Art, literature, and learning flourished. Agriculture, trade, and manufacturing thrived. There was a growing trade and cultural exchange among China, India, and Rome at this time. The great caravan, or "Silk Road," that linked China and the Middle East was in operation by the first century B.C. By the second century A.D., the various sea routes that linked China, Malaya, South India, and Egypt were completed, connecting the Far East with the Mediterranean world and Rome in one great commercial network.

Rome

Rome was a great power in the ancient world. Starting as the Roman Republic, it eventually became an empire and spread throughout the Mediterranean world. Julius Caesar was one great leader who conquered much land for Rome; later, Senators assassinated him in 44 B.C. because they thought he was becoming too powerful. Rome’s first emperor, August, ushered in the period of peace known as the "Pax Romana." Eventually, the Roman Empire was divided into two empires: Rome in the West and the Byzantine Empire in the East.

During this time, Christianity spread throughout the Mediterranean world. Christianity began with the life and teachings of Jesus; however, the Romans tried to suppress Christianity. Later, the emperor Constantine accepted Christianity (A.D. 313) and it was later established by Theodosius I as the official religion of the empire. Jesus’ teachings in the Sermon on the Mount and the parables of the Good Samaritan, the lost sheep, and the Prodigal Son, promoted compassion, justice, and love for others.

The Romans were greatly influenced by the Greeks in art, architecture, engineering, political thought, religion, and philosophy, but adapted those ideas to serve their own empire. Both Greek and Roman cultures influenced Western civilization and continue to influence our lives today.
Questions to Think About:

- Why did certain societies develop in certain areas? (Think about the geographic relationships between site, natural resources, and settlement such as in the river valley settlements of Mesopotamia, Egypt, India, and China.)
- What role did technological, agricultural, and economic development and international trade play in these societies?
- Why did certain societies rise to dominance at particular times in the ancient world? (Think about the importance of relative location in the case of ancient Greece, for example.)
- Why did great civilizations fall, including the collapse of the Indus civilization of India, the decline of Egypt in the years of the later empire, and the fall of Greece to Rome?
- What factors contributed to the evolution of ancient societies across the whole of the ancient world?
- How did language and writing evolve in Mesopotamia, Egypt, and China?
- What were the major religious belief systems? How did they teach people to live a good life?

Can You?

- Create a timeline that places events in chronological order and comparing events that occurred simultaneously in different parts of the world?
- Find on a map where societies first developed? Can you trace where they spread?
- Show how ideas such as religion spread through economic trade and military expansion?
- Explain how early societies and ancient civilizations influence us today?
